Congress Is Urged to Adopt Free Coinage.

LOS ANGELES TIMES: FRIDAY, DECEMBER 12, 1890.

AT WASHINGTON

The National Silver Committee Pr pares a Memorial.

Mr. Dorsey's Treasury Bill to Relieve the Money Stringency.

The Fortifications Appropriation
Bill Passed by the Lower
House—Treasurer Felton Reimbursed.

Washington, Dec. 11.—By the Associated Press. The National Executive Silver Committee today issued an address to Congress. The committee believes that the present money stringency and the breaking down of credit on both sides of the Atlantic is due mainly, if not entirely; to the attempt to conduct the world's growing. as a single money standard, and again appeals to Congress to delay no longer the restoration of silver to unlimited use as money, with all the rights of coinage and legal tender possessed by

All attempts to relieve the present situation by increasing the volume of credit currency or multiplying credit expedients can afford but temporary

credit currency or multiplying credit expedients can afford but temporary relief. With the gold supply constantly diminishing, the population increasing and business rapidly expanding, a recurrence of the present situation must come, forcing a periodical adjustment of prices and business to the ever-contracting scale of the single gold standard. What is needed is a broader basis of primary money, constant and adequate in supply. Bimetalism must be reëstablished. There never has been and is not likely to be in the future too much gold and silver to supply the world's needs for money. To supply the probable population of the United States alone for the next century with the same per capita we now have will require a production of the metals as great as the entire production of the merican continent since its discovery by Columbus. With the free coinage of silver the difference between silver bullion and silver coin must all each disappear and end silver speculation. If everybody can have silver metal converted into coin, free of cost, at the rate of 3712 grains to the dollar, and of course, there can applied to the silver in bullion.

The Committee courses that the fear that free courses would destroy the parity of gold and silver on our ratio of sixteen to one is not well founded. Certainly this cannot take place and continue permanently until enough silver has been coined to provide us with our full distributive share of the world's money independently

of the world's money, independently of gold. Our share at present is \$1,500,000,000, of which at least \$650,-000,000 is gold. Silver enough must be coined, then, to give us fully \$1.5000,000,000 besides gold, and be sides enough to take the place of re-tired bank notes and and supply the requirement of our increasing populaon and growing industries.

tion and growing industries.

Besides, the proposed issue of new paper money will tend in the same degree to displace gold that silver will. Which, then, is the best—metal-

lic money, constant in supply, self-regulating and that needs no redemp-tion, or additional credit money, to be sometimes redeemed in gold, that be-VY of 19 at book-keeping or any kind of office work; good penman; 2 years' experience; good city references. 226 S. BUNKER HILLAVE.

The House Committee on Banking and Currency today adopted a resolu-tion to request the House to set apart a day for the consideration and disposition of Chairman Dorsay's bill to reduce to \$1000 the minimum amount of United States bonds which national banks shall be required to keep on deposit, and to permit the issue of circulating notes by national banks to the full amount of the par value of bonds deposited. This, it is said, would increase the amount of money in circulation. lation by \$18,000,000, and would result in the freer issue of national bank notes. When the bill comes up in the House, Chairman Dorsey will move an amendment to provide for the issue of greenbacks whenever the national ank circulation falls below \$185,-

Mr. Morrill of Kansas was authorized to report favorably a bill to sub-ject national bank and United States' Treasury notes to State taxation.

too smail, but we could get along as we did before it confidence could be restored, and we hope to do that, and increase our circulation somewhat by the bill we will call up. The banks all have they formerly carried. The big banks won't discount our bills and we have to protect ourselves.

Then a great deal of money has been taken out of the banks by people who became alarmed at the course of legislation and locked their money in safe deposits. A great deal of money has been sent abroad to buy consols. Only the other day a man told me that he had \$1,000,000, about all he had, in English consols. SECOND SESSION. WASHINGTON, Dec. 11 .- By the Asoffered a resolution, which was agreed tee to inquire into the feasibility and advisability of a law for postal savings banks in connection with all of certain classes of postoffices throughout the country.

The resolution offered yesterday for the daily meeting of the Senate at 11 a. m. and for a recess from 5 to 8:30 p. m. was taken up. Its discussion was kept up amid considerable excitement on the floor and in the galleries until 2 o'clock, when it went over without action.

The Elections Bill was taken up and Mr. Wilson of lower spokes in force of the first, and \$70,000, \$90,000 and \$100,-900 for the three following years for elementary and industrial education of children in Alassa.

Ross of Texas has complained to Secretary Blaine of the impudence and threats of English Consul Lyall of Galveston. Mr. Blaine told the Britpeople of the country could not be-lieve that the people of Mississippi and South Carolina were as free to use the ballot as the people of Iowa; nor would the people be content until abso-late safety was assured to citizens in the use of the ballot, and until fairness and good faith is shown in counting the same in every State. No more important subject commanded the attention of the search. tion of the people. Mr. Frye said that the pending bill was not one-tenth part the pending bill was not one-tenth part stringent enough. If, in order to secure the right of an American citizen to freely cast his ballot, and have it counted as cast, it was necessary to put a bayonet behind every ballot he would do so. After some unimportant business
the House went into Committee of the
Whole on the Fortifications Appropriation Bill. The bill was agreed to
without discussion and the committee being risen, the bill was passed, to-gether with the bill appropriating \$400,000 to meet the diffciency in the appropriations for public printing and binding.

In the morning hour Mr. Tayler of

Ohio, from the Committee on Ju-diciary, called up and the House passed the bill amending the Revised Statutes. The amendment provides a penality for any person having the custody of ballots and returns after elections held who shall alter such returns or erase the name of any candidate from any ballots in his custody, or shall in any way tear or deface the same with in-tent to effect the result of such elec

A SUBSTITUTE SHIPPING BILL. The House Committee on Merchant, Marine and Fisheries has virtually agreed upon a bill as a substitute for the Senate tonnage and subsidy shipping bills. Formal action will ken by the committee, probably, to-morrow, and assurances have been given by members of the Rules Committee that an early opportunity will be afforded for action on the bill in

the House.

The most important provision of the bill directs that all steam vessels in-tended to be entitled to the benefits of the bill, shall be structurally adapted to conversion to auxiliary cruise transports for the naval service.

The Wrapping-p per Mills Will Close for a Week.
CHICAGO, Dec. 11.—[By the Associated Press.] A meeting of the Western Wrapping Mill Association was held here today. The meeting decided that the entire product of the mills in the association should be sold by agents of the organization instead of salesmen of individual mills. All of the mills will shut down one week the latter part of this month. The association voted

an advance of 5 cents per hundred pounds in the price of all paper. In discussing the shut-down, Judge Kingman of Cedar Falls, Ia., stated that Iowa had a very strict law covering trusts, and he feared that should the Iowans comply with the spirit of such action as proposed, it would be construed as in violation of the law, and the pententiary stared such un-lawful proceedings in the face. Course to the effect that 1700 Indians at Yank ton, Sioux Agency, are now receiving rations enough for barely two days out of the week, and are starving. The crops have failed, and although they are willing to work, there is no employment for such a number during the winter. On ration day they are so famished that they cannot resist eating at once practically all they receive. ing at once practically all they receive, notwithstanding that another issue is not due for a week. It is a standing complaint with these Indians that they have \$1750 owing them for right-of-way land locked up in the Treasury at Washington, and individuals among them are unpaid for services rendered the Government as far back as 1832.

COLD WEATHER WILL STOP IT. BISMARK (S. D.,) Dec. 11.—Maj. Mc Laughlin, agent at the Standing Rock Indian Agency, is in town today. He says that there is no danger of an out-break and never has been. Sitting Bull break and never has been. Sitting Bull and his followers are still keeping up ghost dances on Grand River, but the gnost dances on Grand River, but the wild enthusiasm is rapidly abating. The major thinks a week more of cold weather will stop the dancing. He says that the report from Standing Rock of a cattle stampedenear Buffalo Gap is a canard. No cattle have been run off by the Indiana event their

run off by the Indians except their FAVORABLE REPORTS, WASHINGTON, Dec. 11. - Gen. Schoffeld today received a dispatch from Gen. Miles, of which the following is an extract: "Reports from Gen. Ruger and Ges. Brooke are favorable. The presence of the troops now in position has had a demoralizing influence upon the Indians, and those that week are were default and warinfluence upon the Indians, and those that a week ago were defiant and war-like are now giving evidence of submission, Capt. Ewers of the Fitth Infantry has returned with Hump from Fort Bennett. Hump desires nis allegiance to the Government reflewed, and I will make good use of him in bringing in others."

YESTERDAY'S FAILURES.

Several Minor Commercial Disasters at Various Points.
PHILADELPHIA, Dec. 11.—[By the Associated Press.] Assignee Miller of Barker Bros. & Co., states that the most important creditors of the suspended firm have given a year's extension to meet the indebtedness. It is

believed that the firm will resume soon. BIRMINGHAM (Ala.,) Dec. 11.-The Bessemer Rolling Mills today went into the hands of a receiver as a tempo-rary arrangement. The trouble is caused by the recent failure of the

United States Roiling Stock Company. New York, Dec. 11.—Henry Seibert, tobacco commission merchant, suspended today, with liabilities of \$250,090, and assets about the same. Venable & Herrman, wholesale liquor dealers, assigned today, with liabilities of \$300,000 to \$400,000. of \$300,000 to \$400,000.

BOSTON, Dec. 11.—The Bay State Lasting Machine Company has failed for \$75,000.

Boston, Dec. 11.—George Godfrey, the colored heavy-weight, has accepted the offer of the California Athletic Club, and will fight Jake Kilrain for a nurse of \$4,500, with an additional \$500 to the loser. The contest will take place at San Francisco in the first week of March.

The Coast Line Survey.

greater alacrity, and he did not require quite so much water to cool his parched and burning throat.

The plaintiff was on hand promptly with her mother and two lady friends and Baby "Bess." Baby "Bess." had been very quiet during the trial until yesterday Porning, when she concluded that it was time for her to declare herself, which do py letting out her pair of sixteen-monthsold lungs and giving them an airing. She had to be taken from the courtroom at the afternoon session, and was not returned. O'Brien was at once turned over to the tender mercies of Mr. Williams for cross-examination. Among other things Mr. Williams inquired of him why after Jessie had told him at Del Mar in May, 1889, that she was in a delicate condition, he had never for a moment suspected that he was the father of her then unborn shild, in-assuuch as he had already sworn on direct examination that he had frequently been criminally inhimate with her from October 1886 on.

Dennis said that the idea had never occurred to him.

At this point a rather pointed question was asked the witness by Mr. Williams. To this O'Brien replied in the negative. And so the cross-examination continued during the forenoon, Dennis getting a little mixed on some points, but generally managing to extricate himself in some way.

Taylor on October 15, 1888, He was shown a portion of a ticket with a train check, and he explained the relation of the check and ticket. The object of this testimony was to prove that from October 15 until November 1, or thereabouts, Taylor was not in California.

When the direct examination of Mr. Springer was concluded he was excused without cross-examination. The cross-examination of O'Brien was then resumed,

examined in May, and until she left for San Diego to give birth to her child, she worked as a waitress in the dining-room. Within ten days after she left O'Brien went to San Diego to see her.

The witness explained the circumstances under which Jessie left Del Mar. On the morning on which she left she drove in a phaeton to Taylor's ranch, where the witness was working. A short time after she arrived there Taylor came up and Jessie had a talk with him. O'Brien and the plaintiff also had a conversation, he giving her advice as to what she should de after she arrived in San Diego, and where she should go. Finally Jessie returned to Del Mar, and fifteen minutes after Taylor followed her. Taylor went to San Diego on the same train with Jessie, and returned that evening.

Instructed to notify all citrus ruit-growers lowed her. Taylor went to San Diego on the same train with Jessie, and returned that evening.

O'Brien testified that he did not ask permission of Taylor togo to see Jessie at San Diego. Upon his return from San Diego he did not talk or converse with Taylor as to where he had been or what he had done. In a most amusing way the witness related how he had had a conversation on the train with Taylor while en route to San Diego as to marrying Jessie.—This was in May, 1889. Taylor told him that he thought and the witness thought so also, despite the fact that he knew Jessie had been seduced and that he himself had malar as ix week's acquaintance. When asked it he told Taylor of this fact, he replied no. Neither had he informed Taylor's attorness, so he swore.

When asked how he came to be in Los Angeles at this time, the reply was that he came on the train.

"Who paid your fare?"

"Dennis O'Brien."

"Partly for pleasure, partly for business and partly to see the boys."

"Where were you at when you are subprenaed in this case and when?"

The witness was next shown a letter addressed to the plaintiff written by him on November 30, last, in which he informed her that he was at the Natick and would like to see her. Resolved, Further, that in view of the facts, the chamber fully appreciates the broad spirit that prompted the said managing director, Mr. G. W. Hancock, to move the selection of Los Angeles as the place for holding the coming Citrus Fair, and appreciates the action of the Board of Agriculture in adopting the resolution offered by Mr. Hancock.

A resolution adopted at the meeting of the Citrus Fair Committee, asking the chamber to call a meeting of the citrus fruit-growers for the selection of a new committee was read and adopted.

Mr. Wells moved that the secretary be instructed to notify all citrus fruit-growers in the Sixth District that the meeting will take place in the rooms of the chamber Wednesday morning next at 10 o'clock. Carried.

Several requests that the chamber purchase advertising matter were read and referred to the proper committees.

The board then adjourned.

Report of the Horticultural Commission.

INSPECTIONS BY THE BOARD

The Work of Cleaning Up the Or chards Progressing Favorably
-Much Good Already Accomplished.

The following is the monthly report of the County Horticultural Commission, which has just been submitted to the Board of Su-

To the Honorable Board of Supervisors-Gentlemen: During the month just past the commission has spent much time in the orchards of this city and the Yernon district, assisting and urging on by
every means in its power the very general
movement to clean up, which has been by
the persistent effort of months so happily
has become the persistent effort of months so happily imagurated. The movement has become general all along the line, and its effect is already very noticeable. In the more thrifty growth of the trees and greatly improved appearance of orenards. Improved cuttivation has almost invariably followed the "cleaning up," greatly to the advantage of the trees. Some excellent sales of fruit have been made during the month by parties who have taken the advice of the commission and persistently cleaned their trees, their oranges selling readily on the tree at from 90c. to \$1.25 per box, while their neighbors, who neglected to clean, find difficulty in selling at half those figures, and in many cases cannot find purchasers.

difficulty in selling at half those figures, and in many cases cannot find purchasers at any price.

These facts can be demonstrated to the statisfaction of any one interested.

We are pleased to report that F. O. Cass has cleaned up his orchard, thoroughly spraying and pruning it, and that he now declares himself heartly in sympathy with the commission in their work. Since last spring an increase of thousands of perseent in the number of scale insects on his strees and fruit has quite convinced him that the "Cass bug" is a failure, and that no parasite exists which will unaided keep in check this pest.

The commission during the month again made an inspection of large orchards in the San Gabriel V.lley. Generally the trees were found to be in an improved condition swer that noted a year ago, but the hot dry weather of the past two months has been favorable to the growth and spread of the Aspidious citr. Funds, and as a consequence a very considerable increase in scale on trees and fruit since the last inspection, in the latter part of the summer, was noticed. A movement toward cleaning up, and once more taking up the fight against the scale, has been inaugurated.

Not far from Alhambra Mr. Pollard has commenced to use the gas treatment on his orchard. The commission inspected his apparatus and found it most complete, and the work he had already done must effective. The outific cost about \$500, and is owned among several parties, each of whom will use it after Mr. Pollard.

The commission will spare no pains to forward this movement in the San Gabriel Walley.

By orders of the commission, one efficient inspector in Pasadena, Mr. Richardson, has

Wailey.

By orders of the commission, one efficient inspector in Pasadena, Mr. Richardson, has been making arrangement with parties own ing neglected trees in that city to have them removed, the work to be done under the parties of the companyion.

them removed, the work to be done under his supervision.

He is now busily engaged attending to the matter, and thousands of wretched snags disfiguring the town in all directions will soon be removed. The commission attended the State Horticultural Convention, which met at Santa Cruz. November 18, for the purpose of obtaining the indorsement of representative fruit-growers to an amendment to the present law (said amendment has already been presented by the commission to sour honorable body) to protect and promote the horticultural interests of the State. We especially sought the opinion and indorsement of the horticultural interests of the State. Those commissioners have formed a State organization, which meets at the same place and time as the State convention above referred to. The amendment was laid before this convention of commissioners and discussed in day and evening session for three days. There were thirteen counties represented, and after this most exhaustive discussion and with no opposition on our part to any suggested changes, the amendment was accepted without any alteration, and most heartily indorsed by all the members from Central and N rthern California. The visit of the commission, we think, was a great success and will not fail in producing results most beneficial to the

bers from Central and N rthern California. The visit of the commission, we think, was a great success and will not fail in producing results most beneficial to the fruit interests of the State. All we hoped for in the way of moral support was gained and we managed to excite an interest in counties where little or no interest was felt before, which in a year or two will force the Lewislature to place on the statute book a law for the protection of horticulture which will not be a farce, a snare and a delusion.

The work of cleaning up and disinfecting is being started in the Azusa and neigh-borhood, and a good public sentiment is being aroused. The commissioner for the First District has opened an office in Pomona, where the fruit-trowers can at all times obtain information, advice and assistance, and obtain washes to clean their trees properly prepared. The office also sends out a pump and does the spraying for those who would not or could not otherwise clean up. The office is already very popular and has all the work it can possibly attend to.

All work is done and material sold at cost price.
In the matter of the Moore case we can only report progress as very slow. The matter, against the judgment of the commission, was iaid before the Grand Jury, and as yet there has been no report.

Respectfully.

Respectfully, GEORGE J. MITCHELL,

SUGAR BEET FACTORY. Richard Gird Will Put Up a Big Plant

at Chino.

Richard Gird has succeeded in getting a beet sugar factory for Southern California.

Yesterday John Wasson, Mr. Gird's righthand man called at the Chamber of Com-merce rooms and stated that Mr. Gird is now in San Francisco with Henry Oxnard for the purpose of signing the final papers. Contracts will be let in a few days for

2,500,000 bricks, and work on the building, which is to be located at Chino, is to be commenced in a few weeks. The building will be ef brick 300x90 feet, and will contain the finest plant that can be had.

Mr. Gird will put out 2000 acres to sugar beets, and while he is in San Francisco he will purchase gang plows, so that he can go to work at once. The beets will be planted in March.

in March.

A number of farmers have tested the sngar best on their ranches, and the chances are that many thousand acres will be planted to bests this spring, as the factory is to be of such capacity that it can dispose of all the bests the company can get hold of.

noid of.

The factory at Watsonville, in the Santa Clara Valley, has proved a big success, and Mr. Gird is of the opinion that several can be established in Southern California.

The oil business promises, in the near future, to become one of the leading indusern capital could only be induced to experiment out here people would soon be con-vinced that the supply is something won-derful, and the quality of the oil is far superior to any oli yet discovered. During the past few years the business has grown

the past few years the business has grown from nothing, almost, to quite a tride.

Two big wells have just been discovered at Fullerton. One of these was discovered night before last, and early yesterday morning the second one was found. Both wells are strong, and before the oil could be caught it had flowed down the mountain side in streams.

It is said to be of excellent quality, and it is believed that the flow will not be exhausted for some time to come.

Local oil men are of the opinion that the

Death of Sam B. Hunt.

Late last night a telegram was received from Beaumont announcing the death of Sam B, Hunt, cashier of the State Loan and Trust Company of this city at that place.

Mr. Hunt has been at Beaumont for some time past for the benefit of his health. It was known when he left here that his case was a serious one, but it was hoped that he would be benefited by the change, and recover, and the news of his death will prove a severe shock to his numerous friends in this city. Notice of the funeral will be given hereafter.

THE POULTRY SHOW.

EXHIBITION ROOMS CROWDED YESTERDAY.

Noted Fanciers Present-The Work Scoring the Birds Almost Completed—Some High-Class Fowls.

The third day of the Poultry Show was very successful. The ticket-sellers were kept so busy selling tickets that they were rejoiced to see the doors closed so they could be allowed to go to roost.

Among the visitors yesterday were many well-known fanciers, among them, O. J. Albee, of Lawrence; Rev. Mahlon Wilson, of Pomona; Charles Yale, of Santa Ana,

and many others.

Mr. Wilson brought with him his Newfoundland dog and left him on exhibition. The dog is said to be the most valuable Newfoundland dog in California. Fine pug dogs are also on exhibition, and are attracting much attention. They are owned and entered by Mr. and Mrs. Wiswell.

This candidate would come on to a platform dressed in the shabblest possible clothes and wearing on his feet the coarsest of shoes. This candidate would call the attention of his audience first to his garments. He would say: "These are the best clothes that I can afford to wear under the exactions of the money power which is grinding the poor farmer off of the face of the earth." Then he would pull up his trousers and exhibit his attenuated ankles and calves to the people and exclaim: "Under the workings of this McKinley Bill I can't talk to you very much because I am not educated. I was too poor to go into the schools where only rich people can afford to send their sons. I am ragged, poor and uneducated, but dear friends, I am honest, and if you would send me to Congress I will be one at least two will always stand up and fight the monopolists of the land."

Such a discourse as this was always followed by terrific cheers. In some of the back districts of the Southwest I am told that the country people are actually made to believe that the Farmers' Alliance, if it can only succeed in getting control of politics, will drive out all poverty, pay off all the motrogress and debts of the farmers and system of State banks upon a basis which will enable every poor man to obtain all th modifications in the existing state of affairs. The bill provides for the same number of regiments of infantry, cavalry and engineers as at present, but increases the artillery by two regiments. Each regiment of infantry, cavalry and artillery shall have one colonel, one lieutenant-colonel three majors and the usual number of junior officers, with twelve companies. The number of enlisted men of all grades shall not exceed 30,000, 5000 of whom may be Indians, in the discretion of the President. The new regiments of artillery will be officered by promotion, assign ment and the transfer of officers now in that branch, and any vacancies remaining thereafter in the grade of second lieutenant may be filled by transfer from other arms of the ser

A bill has also been introduced t authorize the President to prescribe a system of examination of enlisted men for the army, to determine their fitness for promotion to the grade of second lieutenant. The bill embodies the suggestions in the annual report of Secretary Proctor relative to the means of preventing the exercise of favoritism in promotions.

> The Leader Hissed at lome Town and Applauded at Others-A Friendly Greeting at Cork.

By Telegraph to The Time. DUBLIN, Dec. 11.—[ly the Associated Press.] The straggle for the possession of the United Ireland office assumed a new phase his morning.
The opponents of Panell, who succeeded last night in breing an entrance into the office and destroying all the leaders prepared by Leamy, appointed yesterday to succeed Bodkin, who was acting manager during the absence of William OBrien, left a guard in possession with orders to resist any attempt of Tarnell or his friends to enter the building. This morning Parnell proceeded to the office and with the assistance of a crowd of his supporters forced open the doors and took possession. The police witnessed the affair, but did not interfere. After the office was taken Parnell appeared at one of the windows, shouting that he would fight the battle to the last; that he would only allow the country to decide the issue, and that he would submit to the dictation of no man. He appeared to be flercely excited and to have lost his usual self-control. control.

To guard against further attempts

To guard against further attempts by his opponents to recapture the office, the doors and windows were boited and barred. When the office was secured against intruders all conversation with outsiders was carried on through the key-hole.

Before Parnell made the attack on the United Ireland office today he procured two crowbars. Handing one of them to John O'Counor, they proceeded to the door of the paper and soon smashed it in. Parnell has ordered that all persons be treated fairly in the

In the afternoon Parnell left for Cork. When, in company with Mr. McCough, solicitor for the National League, he drove to the railway station to take the train, crowds lined the streets, and the windows of houses were filled with spectators. He was cheered.

At Naas he received an address from the local branch of the National At Naas he received an address from the local branch of the National Lesgue. At Monasteravan there was an anti-Parnell demonstration when the train arrived, a priest leading the opposition, and cheering for O'Brien. At Mallow the majority of the crowd hooted and jeered, only a few cheers being raised for Parnell. At Cork an immense crowd gathered, and warnell was received with an outher than the crowd hecame to be a superficient that the crowd hecame to violent and made repeated attempts to enter Parnell's carriage. representative of the Associated Press regarding the United Ireland incident, William O'Brien, editor of that paper, said that the dispatches stated that the eddition which Parnell attempted to

O'Brien cannot believe this, as, when the controversy arose, he cabled instructions to the manager, if the party decided in favor of Parnell, to hand over the paper to his authorized the paper to his authorized agent, and if the decision was against hin, to support the views of the moderately and to see without moderately and to see without fail that nothing personally offensive to Parnell should appear. He received a reply that these instructions would be obeyed.

Referring to the statement that Parnell acted in virtue of his authority as director of the company, and that he owns a majority of the stock, O'Brien said that the shares which stan nominally in Parnell's name are less than half of the capital of the comthan half of the capital of the company. Parnell ceased to be a director five years ago for the express purpose of guarding himself from pecuniary or criminal responsibility for the paper, the wisdom of which course was concurred in by O'Brien and others. Those who foreibly took possession of the United Ireland office had not a shadow of legal authority. As to last night's recapture from the Parnellites, O'Brien could only surmise that some kind people of Dublin, who had not forgotten the record of the paper, allowed their feelings to outrun their forbearance.

Hints of treachery on the part of British statesmen have not lost their power over statesmen have not lost their power over the people, only too well accustomed to traditions of British unfaithfulness by their unhappy history. It is gasy to understand the influence upon our warm-hearted col-leagues and fellow-countrymen of appeals to the feelings such as these, urged with all the authority of Parnell's name with all the dexterity and magnetic power of which he is master. It will be pointed out that the Esquimax there are suffering great hardships, and in some cases are bordering on starvation, owing to the scarcity of deer and particularly on account of the entire failure of the hunt during the past

autumn.

Captain Healy's ideas are to propose to the Government that he purchase a number of reindeer of both sexes, which abound on the Siberian coast, and transport them on the Bear to some point on the Alaskan coast, where moss and feed are pientiful. He will also suggest that the Government enlist the services of some experienced Siberian natives to instruct the Esquimaux in the art of herding these deer, and as the animals become more numerous they can be distributed over Northwestern Alaska and form a food supply for the natives. supply for the natives.

Great Preparations for the Insane Asylum Corner-ston a Laying. own race. SAN BERNARDING, Dec. 11. [By the cendiarism. Associated Press.]—The ceremony of laying the corner-stone of the insane asylum in this city on Monday, the 15th, promises to be a big event for this section. Gov. Waterman and staff will be present, as will also Gov.-elect Markham, State officers, members of the Legislature, the National Guard of Southern California and other prominent citizens. Gov. Waterman has also invited King Kalakaua of the Hawaiian kingdom, who is now in San Francisco, to attend. A grand banquet will be given to the in-vited guests in the evening. Special trains will be run from Los Angeles, Siverside and other points to this city.

"Stubby Jim" Confesses. PORT ANGELES, (Wash.,) Dec. 11.— James Wood, alias "Stubby Jim," suspected of killing Mrs. Moss last Tuesday, was captured vesterday and confessed the crime. He claims that it was unpremeditated. While out hunting he observed Mrs. Moss and was selzed with a sudden impulse to murder her. There is some talk of lynching. The Sheriff has sworn in a number of deputies.

A Case of Ball-Jumping. SANTA ROSA, Dec. 11 .- Ardell, the man shot at Cloverdale by Worth, son of a respectable, well-to-do farmer, died this morning. Worth, who was admitted to bail in the sum of \$3000, cannot be found. Deputy Sheriff Groshong is looking for the murderer. THE ARRITRARY ALLIANCE

Newspapers Must Do as They Say

or Be Boycotted. SANFORD (Fla.,) Dec. 11.—By the Associated Press. | President Polk of the National Farmers' Alliance has named Washington, February 6, 1891, as the place and time for holding the first meeting of the National Legislative Council. One of the last acts of the recent convention was the adoption of a resolution that the policy of the Alliance will be to withhold all support from newspapers which do not conduct Aliance departments, or at least publish Alliance news regularly. This arrangement does not compel the support of Alliance measures or the advocacy of support from newspapers Alliance measures or the advocacy of Alliance demands on the part of these newspapers in their editorial columns. but does compel a certain degree of friendliness on their part, and amounts to the absolute boycott of all newspa-pers which do not come up to the terms of the resolution.

IN A MUDDLE.

An English View of the American

Monetary System. London, Dec. 11.—[By Cable and Associated Press. | The Times says: The whole monetary system of the United States is in a muddle. This condition is due to piecemeal legislation by unprincipled legislators. Unfortunately, instead of there being signs of amendment, it looks likely that further attempts will be made to legislate in favor of particlar classes. The most ominous of these attempts is the demand of the Farmers' Alliance for more currency and that the national banks be compelled to lend money on security of real estate. If the latter demand is ever granted, America will be launched on the dangerous path which the Argentine Republic trod. The present crisis is of an ordinary character, but is made worse by foolish character, but is made worse by foolish monetary arrangements. The safe cure for it is liquidation.

THE LABOR CONVENTION.

Woman Suffrage Will Probably be DETROIT, Dec. 11 .- [By the Associated Press.] At the convention of the American Federation of Labor this morning, Chairman Gompers appointed a committee to formulate the views of the Federation on the subject of the eight-hour day.

A resolution was adopted asking

A resolution asking the Federation to support woman's suffrage was re-ported favorably. The convention re-solved to extend sympathy to the striking Alabama coal miners. A res-

the proposed affiliation, and one of the delegates arose to denounce the section of their constitution which confined admission to white men. A resolution excluding such local unions as draw the color line, and to organize the machinists into a national body, who do not inject the race clause into the constitution was offered, and finally adopted after considerable debate. A respectful request was added, asking the Southern unions to strike the colorline clause from their constitutions, and the whole referred to the Executive Committee.

Amotion was made pledging the delegates present to lend their aid in their respective localities in the formation of a labor union of retail clerks, with a view to their affiliation with the Retail Clerks. United Protective Association of America.

Proud of Mis Years.

Among the many venerable men who registered as voters in Brooklyn for the last election was a tall man with ruddy countenance and white hair and beard. His form was erect, and he would easily be taken for a man of 60.

As he approached the registry clerk and announced his name there was a general craning of necks to catch a glimpse of the proud looking old man. What is your age?"

"Eighty-five years." "Where were you born?"

"In Brooklyn. "How long have you lived in the state?"

"Eighty-five years." "How long in the ward?"

"Eighty-five years." "How long in the election district?"

"That's all, sir," said the clerk, and an American citizen, who was born in 1805 in the house in which he now lives and

always lived, walked away.-New York Herald. The Czar's Gift to Prince Nikita.

Prince Nikita, of Montenegro, is in clover. The czar has purchased the steamer Jaroslaffij for the sum of 3,000,-000 rubles, and has bestowed the same on his highness of the Black mountains. Russian officers and a Russian crew man the ship, and are under orders to remain in the service of Prince Nikita until the latter has secured the services of effi-cient substitutes. The Jaroslaffij is expected shortly at Antivari. The vessel is so equipped as to serve as a warship in case of need. The prince is certainly to be congratulated. He already possesses a yacht which, with his new acquisition, will serve as an excellent com-mencement toward a Montenegrin navy, the realization of which is, I hear, one of Prince Nikita's most cherished hopes. -Galignani's Messenger.

A Monument on Helvellyn. A monument has just been finished which is to be erected on Helvellyn to the memory of Charles Gough, who in the year 1805 was killed while mountaineering, and of the faithful dog who for three months watched over his mas-ter's remains. Sir Walter Scott describes the event in the poem, "I Climb'd the Dark Brow of the Mighty Helvellyn," and Wordsworth records it in his lines on "Fidelity." The cost of the monu-ment has been borne by Miss Frances Power Cobbe and the Rev. H. D. Rawnsley, vicar of Crosthwaite.—London Times.

▲ Curious and Interesting Apron—Various Notes of the Craft. ons Notes of the Craft.

A Masonic apron made in England about three centuries ago is soon to be put on exhibition in this country. The apron is fourteen inches square and is made of white kid. On the top is a semi-circular flap on which Charity is represented in the person of a woman tending infants. In the center is an open Bible surrounded by the customary Masonic emblems, the square and compass. Both points of the latter are hidden, suggestive of an "enter-ad-anneanties" amon On the left side of the apron is a figure with its left arm terminating at the hand in a half moon, while

the right hand is beid aloof. This light's represents Hope. On the right side of the apron is another figure. Its left hand grasps a cross, while its right hand holds a Bible. This is supposed to represent Faith. Alexander G. Abell is serving his thirty-fifth year as grand secretary of California. "Tell you some of the stories?" he queried in reply to the reporter's inti-mation to that effect. "Well, as there is no likelihood of my changing pro-fessions in the near future 1 will give you one of the stories I had thought of writing. It is about the disappearance of young girls. It is the most interest-ing of all the topics I have got, and as a matter of fact it is in that line that private detectives in New York find the most and more profitable of their work. In my own experience, which extends over a period of about twenty years, I have been called upon to investigate the disappearance, either voluntary or otherof at least 100 girls of all ages from all parts of the country.

WHY MANY GIRLS LEAVE HOME. "I only do a small share of the work that is done in that line, however. Taking into consideration the number of detectives who do as much in that line as myself, it is fair to assume that at least 5,000 girls disappear from their homes every year. Some of them are recovered and some are not.

"Some of my cases have been very romantic, and others just the reverse; mostly the reverse. The causes leading up to the disappearances are as numerous as the cases themselves. Disappointment in love, a fancied wrong, severity of treatment by parents, a desire to see the world, the evil influences of improper association, the oily tongued roue and temporary insanity are some of the excuses made. Then there is another class of disappearances which properly come under the head of kidnaping, and still another, where the parents are at loggerheads or have separated, and one side or the other steals the child, and in nearly every case, as strange as it may seem, the child is a

'I recall a case I had a few years ago where a mutual separation took place between the editor of a well known southern paper and his wife. The terms of the separation were satisfactory to both parties, and they went their ways. The couple had a lovely little girl, 12 years of age, who by a provision of the ement was to be sent to a convent to be educated, and access to her granted to each side. Shortly after the drawing the papers the wife came to New York, and stopped on her way at the convent. By cunningly misrepresenting he circumstances she induced the lady to give her possession of the or one day.

RECOVERING A GIRL "The child was smuggled aboard a train and by the next morning was be-yond reach. Then the wife wrote to the yond reach. Then the wife wrote to the husband, saying that until certain unhusband, saying that undil certain unhusband, reasonable money demands were com-plied with she should retain the sole cusof the child. The little one had been brought up to be truthful and up-right, and before she was permitted to write to her father, whom she idolized. a promise not to reveal her hiding place was extracted from her. Her letters were sent to New York and remailed by an aunt. This was the state of affairs when the father reported the matter to

"A watch was placed on the aunt, which was kept up day and night for a week. At the end of that time we had The committee was appointed and the the pleasure of locating the mother and little girl in a small place near Bridgeport, Conn. Then we telegraphed the father, who came to New York as fast as steam would bring him. The day following his arrival he secured his lost one. They at once left for the south, and that ended the matter.

"Another case was that of a beautiful young girl about 15 years of age, who was to come into the possession of a large fortune when of legal age. A disappointed member of the family maned to get her to New York. But a young lover of the girl suspected foul play, and prevailed upon his family to furnish the means with which to prosecute a search for her.

was known to have come to New York, but here all trace of her was lost. We started in, and as there was plenty of means at the back of the chase, we made a hot chase, and succeeded in find-ing her three days later. She was sent to a convent, and in time came into pos-session of her property, and shortly afterward was married to the young man who had instituted the search. They are now living happily, surrounded by a fine little curly headed boy and a sweet faced little girl."—New York Press.

CAP AND GOWN IT IS.

A Serious Graduation Question Settled by Feminine Medical Students.

Grim visaged war has stalked rampant at the Women's Medical college for some weeks past. The contention was over the all absorbing question a to whether de taps and gowns shall be used as the city railway companies as well. A the graduating costumes of the fair ones turned loose from the institution to deal with the ills to which human flesh is conductor could not change it, and after

For years past this question has been annually mooted, but until the present ion there has always been a majority who thought that the costume looked | ductor. In judge said:

This year the factions began their fighting early and the fight has been a close one. Some of the arguments used by those opposed to the "rig" are in the cannot pay it it is his duty to get off. The conductor has a tright to use as much force as is necesmany cases unique. One of the graduating class was heard to say:

"Why, what shall I do if the gowns are adopted? I am to have a white silk dress for graduation, and I want it, too. Oh, no, I shall not vote for gowns."

other of the students, who has passed the girlish age, entered her plea against the gowns. When asked by a younger classmate what she thought of the question she said:

the most weight was that the college had no right to the caps and gowns, be-cause for ages it has been a university costume. A few insisted that the costume was mannish and their delicate tastes could not endure that thought.

The college bulletin board has been an important instrument in the fight. one side would paste a notice, and immediately it would be covered with one by the opposing faction. Notices of meetings to protest were replaced with notices for adoption. At last the friends of the gowns adopted an argument which did much for their side. The photograph of a very handsome woman dressed in cap and gown was framed and hung up on the board. It was, in-deed, a picture, for instead of being mannish it showed a womanly woman, with features well defined, and even the most bitter could find no objection to

The fight has been productive of much ill feeling, for each faction has been re-lentless in its persecution of the other. College chums have separated, and the erstwhile warm friendships have been supplanted by a coolness which borders close on to enmity.

A meeting of the College association

was finally called for Friday night, at which the much debated question was to be argued. All the classes had already taken their stands. The "freshies" were almost unanimous in their de sire for the costume. The second year students were by a large majority on the same side. It was in the senior class that the fight was most bitter. The four years' course is in the curriculum of the college, so that of thirty-seven students but nineteen expect to graduate at the end of the present collegiate year. All are, however, senior, and in the class vote it was found that the nineteen were, with but one exception, against caps and gowns. The one bolting mem-ber turned the scales in favor of the costume, and for a while much feeling was displayed by the young women.

"It is mean," said one young lady, "for eighteen four year girls to try to make nineteen of this year's class wear a mon

And so the fight continued until Friday evening. Promptly at 6 o'clock the president, Miss Potter, called the association to order, and immediately the motion was carried to dispense with all regular business and deal only in caps and gowns. A lively debate followed the motion for the appointment of a com-mittee of three to ask the faculty for their approval of the cap and gown co

Those opposed immediately saw when this would place them, for if carried it meant caps and gowns. Feminine as persions and sarcastic speeches were offered as arguments. In the midst of the uproar a living argument for the costume was most aptly put.

Two of the college's prettiest students, Misses Jones and Griscom, entered the room gowned and capped in the regular university costume. Their appearance caused a perfect silence, followed by round of applause such as seldom greets the new found star. They were well calculated to convert the unbelievers. A prettier picture 'tis certain ne'er was

The fight was now almost won, for question decided by the students. Caps and gowns had won the day, and at the future commencements the white silk

A Combination Garter.

A new device which will be of interest to dealers in hosiery in the United States has been recently patented in several European countries, and an appli-cation for a patent is on file in the American patent office. Said device consists of a combination stocking and garter, made by running a rubber elastic band through a welt at the top of the

The ends of the elastic appear outside of the welt, and may be arranged to fasten with a button or a fancy class similar to those used on kid gloves. The elastic can be drawn out and inserted at will, although the necessity of taking it out does not yet appear, as it is said that the best rubber will satisfactorily stand the washing process. When the elastic is in its place the general appearance of the stocking is not changed, as the fastening, unless metallic, will be of the same color as the stocking.—Chemnitz Cor. I mentioned some time ago that Canova's famous marble group of Thesen and the Centaur was being transported from the Greek temple erected over it in the Volksgarten of that city to the museum of art on the other side of the ring. The Centaur was transposed without difficulty and is already on the pedestal which fills the recess of the first landing on the magnificent staircase of

Yesterday the Theseus was laid upon one of the low heavy carts built ex-pressly for the transport of weighty ob-jects, and was drawn through the gardens toward the gate. The cart had to pass over one of the water drains which run under the Volksgarten. The weight was too much for the thin vault, which gave way, and suddenly the cart sank on one side, turned over, and the statue lay shattered on the ground. The right arm, which holds the club on high, was broken off at the shoulder. The statue was raised and placed under the trees of the Volksgarten, whither the whole city will run to see it when the news of the mishap gets afloat.—Vienna Cor. Lon-

A LOST ADDRESS.

A Trinidad Lady Writes to San Francisco for It.

Mrs. Harriet McNamara of 219 State Street Trinidad, Colorado, while visiting in St. Louis last summer, did not suffer with her usual sick headaches and indigestion. But upon her re-turn to Trinidad her old troubles came upon her. It was not the St. Louis climate that did so much for her sick headaches. The secret is told in the following letter, received by Thomas Price & Son, the well-known assayers of 524 Sac amento Street, San Francisco. Mrs. McNamars

writes:—
"Three months since I was visiting in St. Louis and obtained two bottles of Joy's Vegetable Sarsaparilla. It was of great relief to me in my headaches and indigestion. Since my return to my hone in Trinidad-I feel the need of it, and as I have jost the address I write to you to ask if you will not kindly forward this letter to the proper number in San Francisco, and have-me sent a few more bottles of this valuable vegetable compound."

The Ladies' League of the Universalist Church was more than pleased at the result of their efforts last night, and the night before. The supply of candy ran out at the booth where the tooth-destroying dainties were sold on Wednesday night. Last night supper was enjoyed by a large crowd, oysters being the principal feature of the bill of fare. They were search in With mine host Warner.

At the meeting of citizens in Williams Hall yesterday, the majority of the property-owners and residents on Colorado street, who signed the petition, praying that Colorado street be paved, withdrew their names.

In the art booth may also be seen a genuine Russian table cover, upon which stands the famous Russian

upon which stands the famous Russian Samovar and the accompanying para-pharnalia used in producing as good a cup of tea as was ever brewed.

The amount of popoorn and candy sold so far would indicate that the members of the church and their friends are extraordinarily fond of those articles. Today, or rather tonight, the fair will close, and any one who wants to purchase articles for Christmas presents, or, indeed, almost any useful article, should not fail to visit the fair before it becomes a thing of the past.

NOTES AND COMMENT.

The recent rains do not appear to have affected the price of barley or hay as yet. One of our dealers in grain said yesterday that no change in market prices had taken place and that he looked for none for some time. In fact, it was altogether probable that prices would take a slight advance before very long. With prices away up in the air as at present a man needs a good big bank account to enable him to indulge in the luxury of horse flest. Barley hay is now quoted at \$1, with second grade at \$5 cents. Bran is \$1.35, corn \$1.40, mixed feed \$1.60, and alfalfa 90 cents.

A beneficial result of the present inflated prices will probably be that more grain will be planted, more land put

grain will be planted, more land put under cultivation and more men af-forded employment. This will un-doubtedly result to the advantage of the buyer by causing an over-supply and forcing down prices. While the producer may not command the prices which present rates would have him which present rates would have him to expect, he will be benefited by the increase in the value of his land aris-ing from additional cultivation, be-sides attaining a fair price for his

The action taken by the citizens' meeting vesterday afternoon makes it extremely doubtful whether the hopes cherished by those who are obliged to do business on Colorado street will be realized. While the cost of the pro-posed pavement would be considerable, it would seem as though the resulting efits would more than compensate

New York, Dec. 11.—The stock market today was feverish and weak in the forenoon, but strong, though duil, later in the day, leaving most of the stocks fractionally higher, sithough there were a few material losses among those stocks to which the bears paid most attention. Lake Shore and Atchison are up 1½, while Southern Pacific is 1½ lower. The reactionary spirit was still strong in the stock market this morning, and while changes in the opening prices from those of last evening were quite irregular, they were in the majority of cases declines. The general list was duil, but there was great activity in St. Paul and Union Pacific, the former declining ½, and the latter 1½. Later trading developed no feature whatever, and at 11 o'clock the market was quiet and firm, a shade better than the opening, Stocks were duil after 11 o'clock, but some stocks made fractional advances, which brought everything up above opening figures. The general market showed no feature of interest, and at noon the market was dull and firm at the best prices of the morning. After 2 o'clock the market increased in activity. Rock Island rose 1½, Northern Pacific and St. Paul each 1 per cent. Later prices reacted slightly, and finally closed duil and firm, at close to the best figures of the day.

ALMOST BLOWN FROM THE TRACK

Manager Wade's Work in the Calon Pass-The Road Placed in First-

Rather a singular thing occurred on the Southern Pacific, just the other side of Colton, the other day. A special fruit train as making good time when all of a sudden a violent windstorm struck it, and for a few minutes it seemed that the heavy train was about to be lifted from the track. Even the engine was swayed from one side to the other, and the train hands thought a real Kansas cyclone had struck them. Before the train passed through the windy belt the the roof of one of the cars was lifted bodily and carried fully one hundred feet from the track. The men who were on the train sayed the nacrest thing they have ever seen in this country to a cyclone, and had it struck a passenger train there is no telling what damage might have been done. The heavy loads in the cars is the only thing that saved the train from being wrecked.

Of Pure Cod Liver Oil with Hypophosphites Of Lime and Soda.

There are emulsions and emulsions, and there is still much skimmed milk which marquerodes as eream. Try as they will vanny manufacturers cannot so disguise their cod liver oil as to make it palatable to sensitive stomachs. Scot's Emulsion of PURE NORWEGIAN COD LIVER OIL, combined with Hypophosphites is aimost as palatable as milk. For this reason as well as for the fact of the stimulating qualities of the Hypophosphites, Physicians frequently prescribe it in cases of

DISEASES

-OF THE-Throat and Lungs Head,

Successfully treated by

M. HILTON WILLIAMS, M.D. M. C. P. S. O., 137 SOUTH BROADWAY, Los Angeles, Cal.,

By his Aerean system of practice, which consists of Medicated Inhaiations and Compound Oxygen, being administered to the patient, instead of filling the system with poisonous drugs adm nistered by the stemach. This is the system of practice which s now attracting the attention of the best physicians throughout every country in the civilized world, and truly wonderful are the results obtained after all other means have falled in accomplishing any good whatever.

ASTHMA.

It is a common error to suppose every disease which is attended by oppressed breathing to be Asibma or Puthisic. We have shortness of breath in Consumption and Preumonia, just as we do in Asibma, only that in these diseases it is always present, whereas in Asibma it occurs in paroxysms. Freumonia, just as we do in Astama, only that in these diseases it is always present, whereas in Astama it occurs in paroxyems. Astama is a spasmodic desease of the lungs, which manifests itself in periodic attacks or "n.s." It comes on sudenly and is attended with a stream of the lung of the

ness of breath is increased on the slightest exertion.

It is a foolian conceit of many peopet to believe that if they inwe assume they cannot get consumption. The truth is the very opposite. They are more liable to fail into consumption because they have the Asthma Another idea is that the Asthma another idea is that the Asthma itself is not a dangerous disease, and yet the published tils of mortality for this city prove to all who read them that great numbers lose their lives every year by this foul destroyer of our homes.

lives every year by this foul destroyer of our homes.

Without courage and perseverance nothing is curable But with these, aided by proper and skill ful treatment, Asthma can be cured even after the lungs are extens evely diseased. Persons desiring treatment by this system of practice can use the remedies at home as well as at our office, and which will cause no inconvenience or hindrance from business whatever. Every case of Asthma is curable. Eastern visitors and invalids will be wise in being cured before they return home.

Those who desire to consult me in regard to their cases had better call at the office for an examination, but if impossible to visit the office rersonally can write for list of questions and circular, both of which will be sent free of charge. Address
